## WELLNESS CALENDAR

- January* – Gut Check: GI Health & Abdominal Radiographs

New year, new belly check! We kick things off with a deep dive into digestive health—think GI panels and abdominal X-rays to catch any sneaky issues hiding beneath the surface.
- February* – Matters of the Heart: Cardio Month

We’re putting your bestie’s heart center stage. With a visiting cardiologist, blood pressure screening, EKG, and ProBNP testing, we’re catching heart issues early—because love starts with a healthy beat.
- March* – Just Breathe: Lung Health & Chest X-Rays

This month is all about air power. Chest radiographs and oxygen level checks help us keep your pet’s lungs clear for all the sniffs and adventures they live for.
- April* – Allergy Season + Bug Off: Parasite Prevention

Spring’s in the air—and so are allergens and parasites. We’re tackling itches, sniffles, and pests with full skin and parasite checks (including fecals) to keep your pet comfy and crawl-free.
- May* – What’s in the Bowl?: Nutrition Month

Healthy habits start at mealtime. We’ll review your pet’s diet and tailor a nutrition plan that fuels them for more tail wags, zoomies, and snoozes in the sun.
- June* – Adventure Awaits: Travel Prep Month

Whether you're beach-bound or trail-hopping, June is all about travel safety. We check vaccines, prep you with a first aid kit, educate on travel tips, prepare for motion sickness, and get your pet ready for a low-stress summer adventure.
- July* – Inside Scoop: Ultrasound Month

Ultrasound month means answers without the guesswork. We’re using advanced imaging to monitor vital organs and catch subtle changes before they become big problems.
- August* – See & Hear: Eyes & Ears Month

Time for a sensory check! We’re zooming in on eyes and ears to make sure your bestie is seeing clearly, healthy ears, and staying ahead of common problems.
- September* – Fit & Fetch: Fitness Month

Fall hikes, cooler temps, and big energy—September is prime time to check joints, muscle tone, and endurance so your pet can crush hiking season in tip-top shape.
- October* – Spooky Good Bloodwork: Hematology Month

We’re not afraid of a little blood—especially when it gives us early answers. Full blood panels help us find hidden threats before they haunt your bestie’s health.
- November* – Minty Fresh: Dental Month

Smiles this season? Absolutely. We’re focusing on clean teeth, healthy gums, and sweet breath—just in time for couch snuggles and holiday selfies.
- December* – Detox & Defend: Kidney & Liver Screening

The holidays are full of cheer—and hidden toxins. We’re screening kidneys and liver to keep those vital filters functioning at their best through the season and beyond.
